THE WINGSHOOTING EXPERIENCE

High-volume shooting, *from dawn to dusk*

Argentina's dove population is unlike anything else on Earth. The Eared Dove — found in astronomical numbers across Córdoba's agricultural plains — offers relentless, fast-paced shooting from morning to dusk.

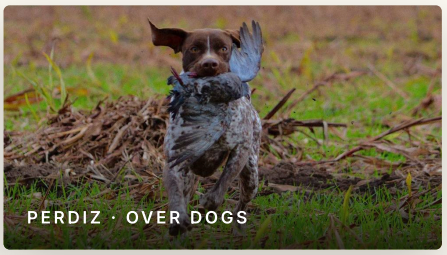

Your personal field assistant is stationed with you, ensuring your shotgun is always loaded and shells restocked without interruption. This is non-stop action wingshooting at its purest.

Beyond doves, the calendar also includes pigeon shooting — technically demanding and highly rewarding — and perdiz, Argentina's native partridge, for those looking for a more traditional, walk-up hunting experience.

Luxury stay in our Orvis Endorsed Lodge on the banks of the Aluminé River, far from the tourist centers of Northern Patagonia.

A 90-mile scenic drive north from the town of San Martín de los Andes and its airport, which connects to Buenos Aires.

The only fishing lodge on the riverside where — with #3 to #6 rods and floating lines — you can expect to catch numerous wild 20″ Browns and Rainbows on dry flies and nymphs. All fishing is done from Drift Boats or Catarafts, covering 6 to 7 miles of river a day.

WILD RAINBOW TROUT

PATAGONIA, ARGENTINA

Limay *River*

Migratory trophy browns & rainbows. The “trout of a lifetime” is possible as the big fish leave the reservoir and start up the river in the fall.

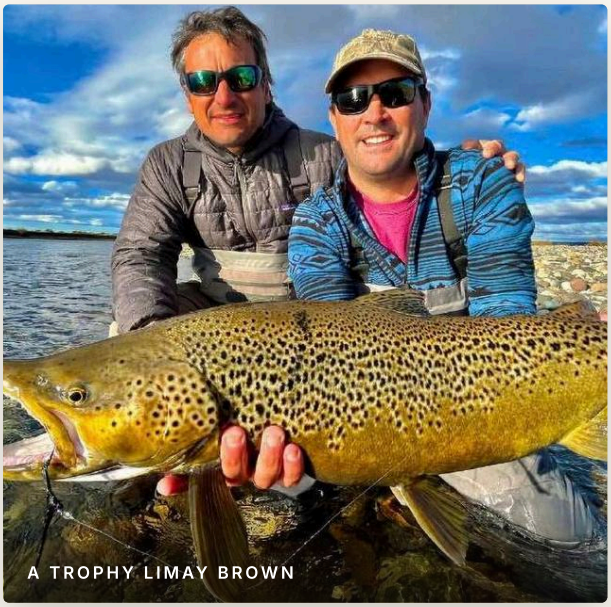

This massive river flows north out of the Nahuel Huapí lake for 240 miles with a flow of 700 cubic meters per second. The area we fish is from the “Piedra del Aguila” dam up to the beginning of the reservoir of the “Chocón” dam, about 50 miles.

The big fish leave the reservoir and start up the river in the fall (April and May) to reach their spawning grounds. Fishing is done from drift boats and catamarans for two anglers and a guide.

SEASON

A TROPHY LIMAY BROWN

WADING & DRIFT BOATS

Perfect for single or two-handed rods, with options for wading and targeting migrating large fish. All techniques are used: light gear with floating lines for the resident browns and rainbows, and heavier gear with fast-sinking lines for the migrating large fish.

SPEY CASTING

The Limay is also ideal for Spey casting. Our guides are all Spey casting instructors and pioneers in the instruction of this technique — with the gear and more than 15 years’ experience to teach you the Spey cast.

Note on fall weather: fishing here is done in early to mid-fall, so it can be cold — from a few degrees below freezing to the early sixties in Fahrenheit. Layers of clothing and rain gear are a must. Waders are highly recommended to keep your legs warm and dry, and to let you step off the boat to complete the fight.

UPPER PARANÁ RIVER · MIGHTY PARANÁ, ARGENTINA

Golden *Dorado*

Aggressive Golden Dorado on the Mighty Paraná River. These waters are home to the largest Dorados anywhere.

THE "GOLDEN KING" OF THE PARANÁ

THE GOLDEN TREASURE · ESQUINA

The dorado — known as the "Golden King" — is one of the most sought-after freshwater game fish in the world, renowned for its explosive strikes, acrobatic fights and stunning golden coloration.

Our lodge on the Upper Paraná offers private access to some of the best dorado waters in Argentina, with comfortable accommodations and expert guides who know every stretch of the river. The tropical environment — warm weather, lush vegetation and the raw power of one of South America's mightiest rivers — is a completely different experience from Patagonia.

SEASON & CLIMATE

Best fishing from March to October (fall to mid spring). Temperatures range between 10°C (50°F) and 30°C (86°F). Quick-drying fishing wear and layers recommended.

FISHING METHODS

Fishing is done from skiffs with a 60HP outboard motor and an electric trolling motor, with two anglers and a guide per boat.

6 NIGHTS · 5 FULL DAYS · INCLUDED

- Comfortable riverside lodging
- Private access to the river waters
- Hearty meals, beers & fine wines
